INTRODUCTION

SPL is a pioneer provider of electronic vending and micropayment facilities as well as construction and provision of parking facility management services. We provide on-site management service at multi-level and surface parking facilities for all major markets of the parking industry. SPL exists to help meet the needs of IT challenges in electricity, micro payment, provide solutions to parking challenges and generate revenue for government and government agencies of a rapidly changing world.

This will be achieved through the convergence of up-to-date Information Technology platform and well trained and motivated work force.

The company deploys the latest technology in distribution of electricity facilities, easy purchase of credit units and park and pay services, which have been complemented by an aggressive marketing campaign which establishes a balance between public interest and the core business objectives of the organization

SPL owns the intellectual property rights to most of our products, including the hardware systems and point of sale terminals, automation software. For these reasons it is possible for us to approach client(s) projects with the flexibility to tailor the SPL's client relationship to suit the client's peculiar needs.

This is particularly useful to those of our clients who prefer their projects to be implemented on a partnership basis where SPL takes responsibility for implementation of systems as well as ongoing project management.

SPL ORGANOGRAM

- SPL was incorporated in 2010 under the companies and allied matters act of 2004 as a multi- faceted organization with expertise in IT solutions, electronic vending, micro-payment systems and parking management.
- SPL operations are wholly automated and thrive on the power of our vending and collection solutions.
- We are currently working with the Telecoms Industry in Nigeria to provide virtual Airtime topup's with the support of our e-kiosk, virtual wallets, web portal, point of sale terminals and bank ATM's.
- Our systems also encompass commuter service payment solutions for high capacity buses, trains and air fares i.e e-ticketing payments.
- We also provide e -payment solutions for government and private sector. i.e Business permits, tenement rates and water rates
- We are also currently providing payment solutions to parking companies under the controlled Parking Scheme undertaken by the Federal Capital Territory Authority

Abuja.
07030973539

- To provide a stable electricity vending and micropayment access to enable easy tracking and easy consumption.
- Reformation of Information Technology on adaption of new technologies both in vending/park and pay.
- Creation of employment for teeming youth parading the street without guidance and focus.
- To create a conducive environment for parking across different zones.
- Liase with appropriate government regulatory agencies to enforce parking rules and regulations across cities.

MISSION

Our mission is to recreate, develop and maintain a top notch electronic payment system that is service driven and would always leave our clientele satisfied.

VISION

To be the leading provider of micro-payments and parking management facilities engineered to create a new experience across West Africa.

VALUES

SPL puts particular emphasis on satisfying customer needs and providing high quality services to its customers. To achieve these objectives, SPL has established a quality management service to guide its business practice. We bring creative solutions to our clients through a complete range of operational, planning, design and developmental services.

PREPAID ELECTRICITY AND AIRTIME

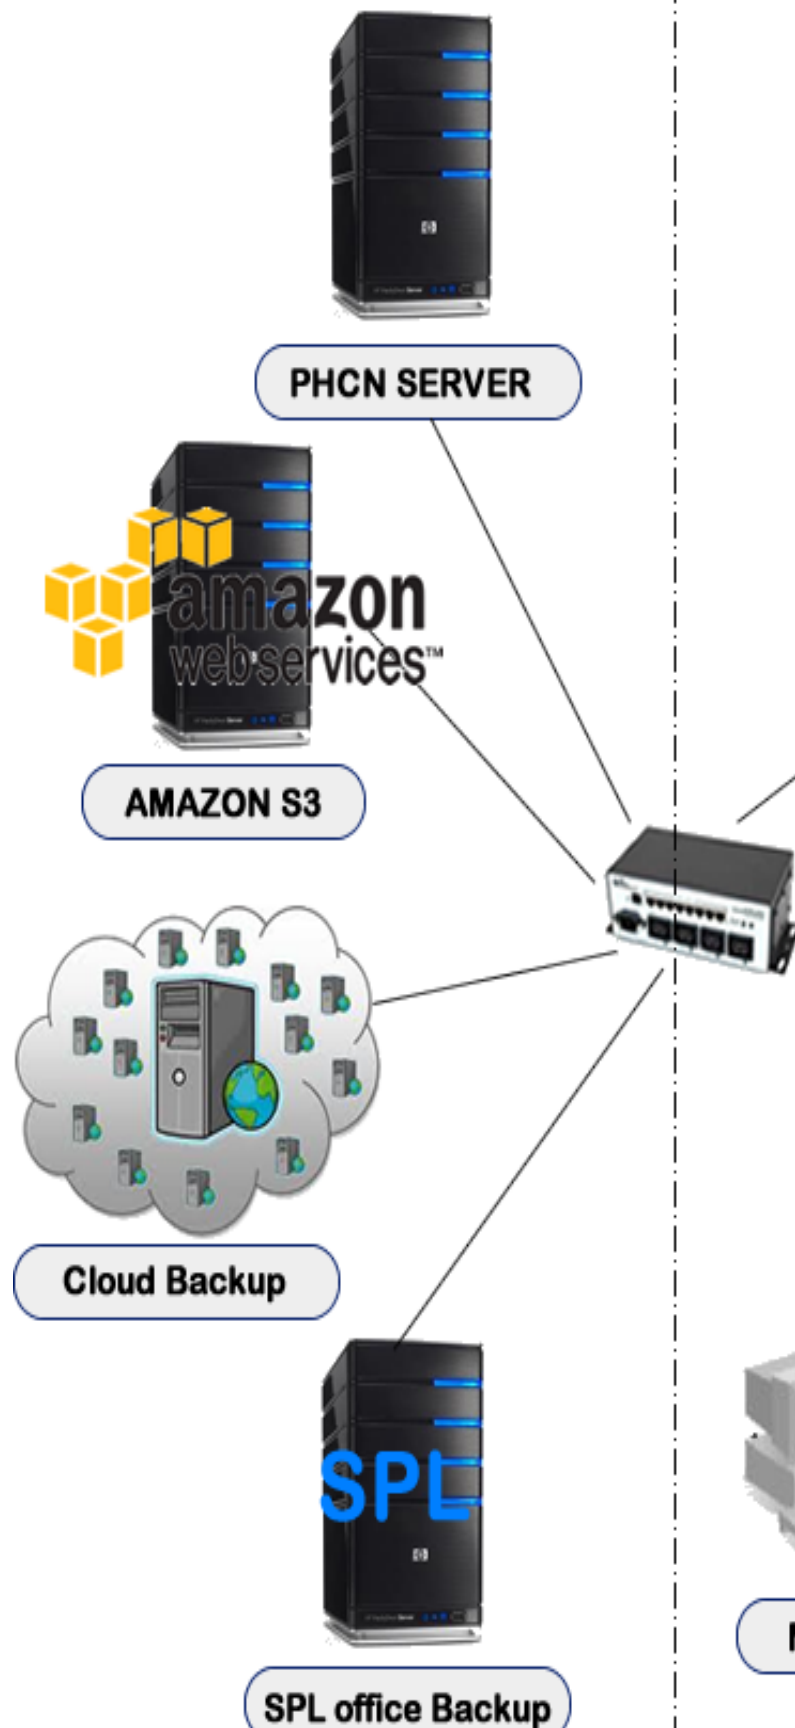

Our vending solution provides a distinguished platform to distribute, sell and manage airtime and electricity prepaid voucher stock within Nigeria.

Prepaid vending solution is an innovative product designed to facilitate prepaid electricity and airtime purchases through a nationwide network of terminals. Consumers are frustrated with the lack of electricity vending points and long queues.

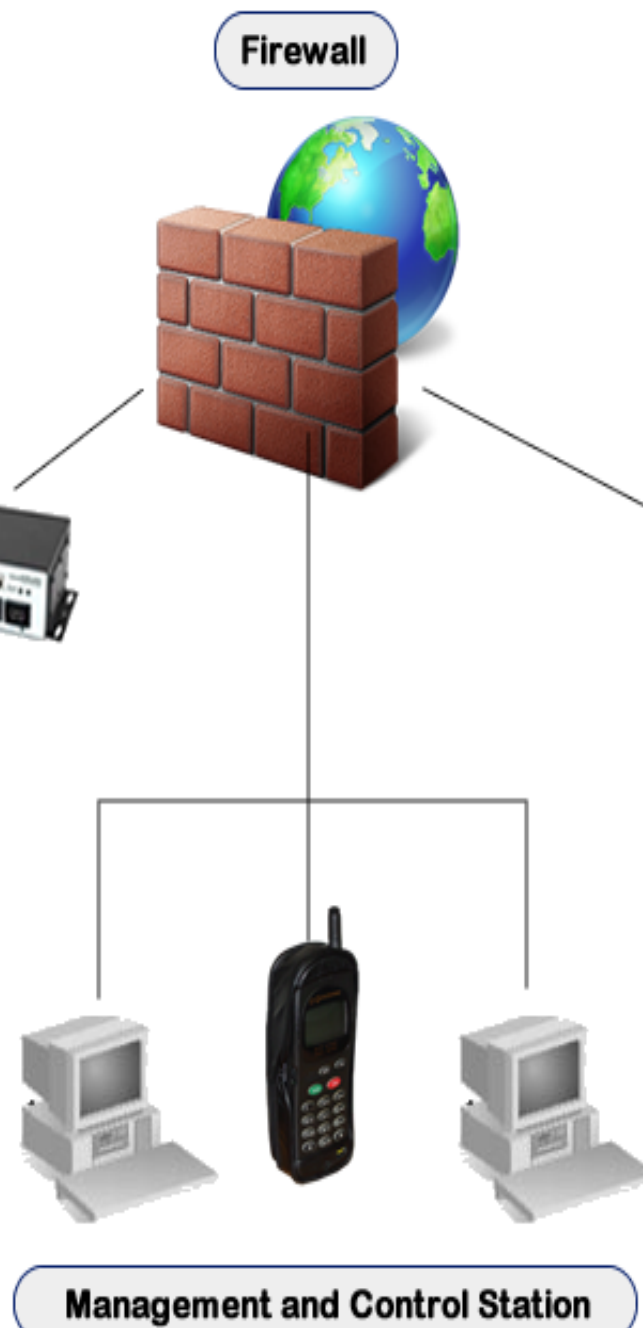

The terminals offer a permanent connection via secure, fast and reliable GPRS communication making it truly wireless. Supported by dedicated partners all over Africa.

- Free point-of-sale and advertising material.
- Free delivery and telephonic training (including manual).
- Excellent rates for the merchant, providing a strong revenue stream.
- Continuous support and maintenance.
- Consumers may purchase electricity at their own convenience, anywhere at any time.
- It improves service delivery to the local community.
- Taking services to the people.

Vending machines have gone through significant changes and innovations. Many machines are evolving to accept credit cards and our company is now able to monitor a machine's state from afar. Many telemetry technology providers are competing for the standard as the market tests different vending machine setups. Based on early documentation, digital telemetry communication for stocking and credit card style payment systems saves up to 40% of the carbon emissions over standard human monitored and mechanical change systems.

Our devices are stable, easy to operate and well optimized for our electronic vending and parking industry. Its compact design fits into most work environments thus making it extra convenient for operations with its touch-screen option.

Parking is an essential component of our transportation system. Vehicles must park at every destination. A typical automobile is parked 23 hours each day, and uses several parking spaces each week. Parking convenience affects the ease of reaching destinations and therefore affects overall accessibility.

Here at SPL we provide innovative parking solutions that can be tailor made to suit your budget and architecture specification.

We create programs, design and exhibit world class exquisite promotion for companies through our products and services, which expands higher level of exposition and awareness.

We manage public and private parking for garages and surface lot; providing superior operations and asset management services for all types of parking, including event, valet and assisted parking.

We also carry out the feasibility study and construction of multi-storey car parking facilities in otherwise space constrained environments.

SPL also engages in providing prompt and accurate reports for parking facilities.
